DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Patel et al. (US Patent 6,295,986).

Patel et al. '986 shows a nozzle for aerosolizing a flowable liquid formulation for delivery to a patient comprising a sheet of flexible membrane material having an entrance side to which formulation is applied under a pressure, and exit side from which aerosol is released, and a nozzle area, which nozzle area has a plurality of pores therein through which the formulation is extruded, each of the pores having an entrance aperture and an exit aperture having a pore entrance aperture size and pore exit aperture size wherein the ratio of pore entrance aperture size to pore exit aperture size is at least about 10:1 (column 4 lines 40-49). The limitations of instant claims 4 and 5 are disclosed in column 6, lines 27-54 and the limitations of instant claim 6 are disclosed in claim 1 of '986. The limitations of instant claim 7 are disclosed in column 4, column 11, and claim 10 of '986.
